

DRAGONFLY *Escape*

Snakes & Ladders Rules

Objective

Be the first player to reach the final square on the board by moving your piece from start to finish.

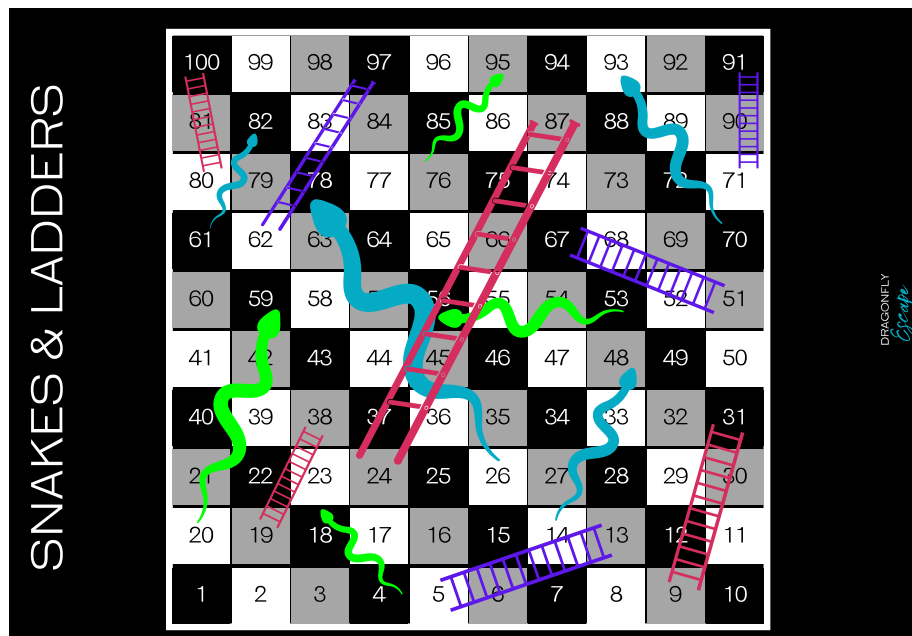

Setup

- Place the Snakes & Ladders board in the center of the play area.
- Each player chooses one playing piece.
- All players place their pieces on the starting square (1).

Movement

- On your turn, roll one die.
- Move your piece forward the number of spaces shown on the die.
- Players move forward following the numbered path on the board.

Players continue taking turns rolling and moving their pieces toward the final square.

Ladders

If a player lands on the bottom of a ladder, they immediately move their piece to the top of that ladder.

Ladders help players move forward quickly.

Snakes

If a player lands on the head of a snake, they must move their piece down to the snake's tail.

Snakes move players backward on the board.

Exact Roll to Win

A player must land exactly on the final square to win.

If a player rolls a number that would move them beyond the final square, their piece does not move.

Winning the Game

The first player to reach the final square wins the game.
